

Innovafit® CLAMPS

FOR BIOPHARMA USE

—
New design represents a new generation of clamping technology for the pharmaceutical industry. They feature an outer body with no sharp edges, eliminating the potential for snags, scratches and punctures.

Bio-Pharma

Innovafit® Clamps

Innovafit® Mid and Large Tube Clamps provide innovative clamping technology and are designed to accommodate large diameter and thick wall tubing applications. It is compatible with standard, braided (reinforced) and multi layer tubing. In addition to providing complete fluid stoppage, Innovafit® Clamps can be utilized in the flow position and features an integral bore hole for absolute lock-out capabilities.

Features

- Complete fluid stoppage
- Smooth edges and corners
- All materials animal derivative-free
- Autoclavable and sterilizable (autoclave not recommended for polypropylene clamps)

Material

Nylon 66 with GF filled

Applications

- Drug delivery
- Pharmaceutical processes
- Media process systems
- Sterile bag systems
- Aseptic fluid transport
- Bioreactors and fermentor
- Laboratory functions
